All About...

THE INSTITUTE

Construction Specifications Institute
99 Canal Center Plaza, Suite 300
Alexandria, VA 22314
www.csinet.org

Founded in 1948, the Construction Specifications Institute is a not-for-profit technical organization dedicated to the advancement of construction technology through communication, research, education and service. CSI serves the interests of architects, engineers, specifiers, contractors, product manufacturers and others in the construction industry.

THE MAGAZINE

The Memphis PerSPECTive is published ten times a year by the Memphis Chapter of the Construction Specifications Institute. Appearance of products or services, name or editorial copy does not constitute an endorsement by the Memphis Chapter of CSI nor any of its members.

Circulation of *The Memphis PerSPECTive* includes over 275 people consisting of members of the Memphis Chapter of CSI, members of the Memphis AIA Chapter, CSI Regional editors, the CSI Institute and other interested persons nationwide. To be included on future mailings, forward your name and address and a check for \$25.00 to the following address:

The Memphis PerSPECTive
P.O. Box 172349
Memphis, TN 38187-2349

You may also access a complimentary copy of *The Memphis PerSPECTive* online at www.csimemphis.org.

MEMBERSHIP

Architects, engineers, contractors, and manufacturers—14,000 members strong—are in touch with one another through their Construction Specifications Institute membership. CSI provides contacts in the construction industry as well as provides you up-to-date information to help you do your job efficiently and effectively. Yearly Institute membership fee for Professional, Industry, or Associate is \$240 plus \$40 Memphis Chapter fee = \$280; Institute membership fee for Intermediate is \$115 plus \$40 Memphis Chapter fee = \$155.00; and Institute membership fee for students is \$27 plus \$10 Memphis Chapter = \$37.

Membership Info. - Rachel Gardner 901-577-0598
Email rachelgardner33@yahoo.com

For contact information on any Board Member or Committee Chair, see inside the back cover for a complete listing including phone and fax numbers as well as available email addresses.

SUBMITTING ARTICLES

Readers are encouraged to submit articles of interest within the construction industry for publishing. Articles on individual projects whether currently in design, under construction, or recently completed are encouraged.

Any article and its related images must be submitted **before the 20th of the month preceding publication** in order to meet production deadlines. Any printed articles, photos or program inserts should be forwarded to:

The Memphis PerSPECTive

Attn: Duke Walker
612 North 5th Street
Memphis, TN 38107

or

dukeonbass@yahoo.com

Articles and images should be submitted in electronic format via digital media or email.

Microsoft Word documents are strongly preferred for articles, minus tabs and any other formatting. All images must include a date and caption. If printed photographs are submitted, please include SASE

Magazine Info. Contact - Duke Walker 901-355-6208

MAGAZINE ADVERTISING

The advertising rates for 10 issues of *The Memphis PerSPECTive* in printed version and as published on the CSI Memphis Chapter website (www.csimemphis.org) are as follows:

	5 Issues	10 Issues
One-Eighth Page	\$125	\$215
One-Fourth Page	\$245	\$430
One-Third Page	\$330	\$575
One-Half Page	\$490	\$860
Full Page	\$900	\$1,600

Tabletop Displays at Monthly Meetings

At each monthly meeting, the Chapter encourages Industry Members to provide a table display of their product and/or services for inspection and education of those attending the meeting. After the meal and prior to the program, the displayer will be given five minutes to address the group. The table display is also encouraged to be represented during the social hour and after the program for any questions by the attendees.

The presentation fee for this time is \$25.00.

President's Message

Pam Davidson ,CSI

If you missed coming to the Christmas Party in December, you missed a great time. **Dexter Varnell** and **Bryan Donaud** did a fantastic job. We had a meal catered by Drapers Catering, a tour of the Woodruff-Fontaine House, door prizes, a great bartender, and great fellowship! This was a first in many years of charging for the Christmas Party, but I think the Memphis Chapter was right on target in supporting our community by having this party at the Woodruff-Fontaine House. The funds will help support the continued effort to keep the Woodruff-Fontaine House open.

As we are in our second month of the New Year, I want to encourage everyone to keep up their commitments to their committee and to the Chapter. As a twenty year member, the most important reason I have continued to stay in CSI is because of the Memphis Chapter. I do not always agree with Institute and their way of doing things, and in the surveys sent to me, I always made it a point to say "Let the members vote". In any organization there will be things you do and don't like. Your opinions, suggestions, complaints, and compliments are important to the Board and me. All members of the Memphis Chapter are always welcome to attend any board meeting. We want to hear from you! Our board meeting will be February 25th, 4:00 p.m. at the Racquet Club.

For the February meeting, we will discuss Masterformat 95 (Divisions 1-16) and Masterformat 04 (Divisions 01-49). CSI no longer supports MF95 as of December 31, 2009. Most of us are still using MF95 at the request of our clients. I will always feel that this issue should have been put to a membership vote. As President's Day falls in February, we will also acknowledge our Past Presidents of the Memphis Chapter. The meeting will be on Thursday, February 25th at the Racquet Club on Sanderlin. Our normal 3rd Thursday meeting was changed this month due to the

Racquet Club having their tennis tournament the third week. We will change our meeting time starting with **social hour at 5:30, dinner 6:00, and program at 7:00**. Call 261-4671 or email pdavidson@allenhoshall.com your **reservation or cancellation** by **February 23rd - 3:00 p.m.** Dinner cost is \$20 for members and non-members and \$10 for students. Cash or check at the door or go on line for pay-pal at www.csimemphis.org. Spouses are always welcome to attend. **No-shows will be billed.**

As our product show draws closer, I would like to encourage every member to "sell a booth". Our Products Show is the "Best" in the region. The date is Tuesday, March 16, 2010. Visit Memphis Chapter website for additional information on booth floor layout and Exhibit registration forms. Forms are also included in this issue. **Ron Roberts** and his committee do an excellent job. I was on the committee last year and found out just how much work is involved in putting this show on. **Harvey Wilmoth** and **Mary White** have arranged for a seminar on "Floor Slab Moisture Problem Resolutions" (1 CEU credit) presented by Barrier Bac and "BIM and Beyond for the AEC Industry" presented by Applied Technology Group (2 CEU credit).

See you at the meeting.

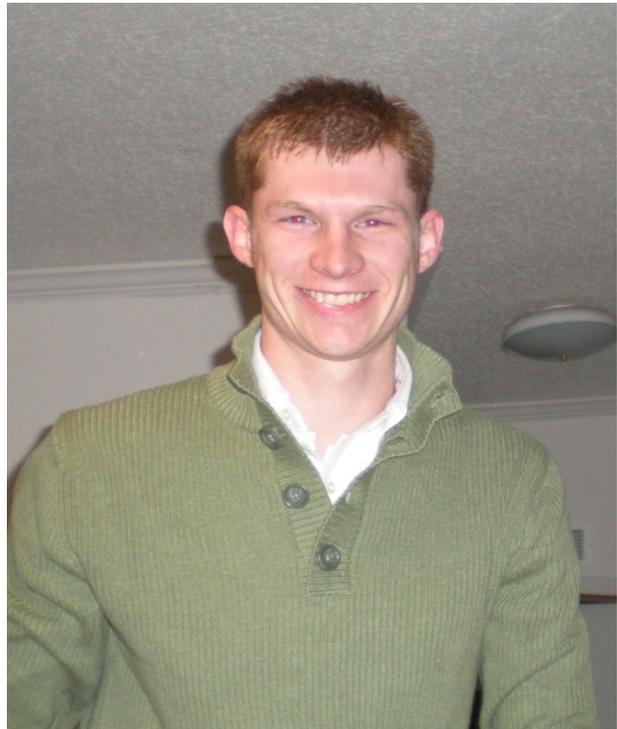

*Pam Davidson, CSI
Memphis Chapter President*

Student Affiliate President's Message

With the new student semester beginning, students are changing classes, changing schedules, and the CSI student chapter is making changes. This spring looks good for the student chapter. We have made changes in deliberating tasks and scheduling. With four very good entries for the Product Display Show poster, it already has started out great. I am very pleased to see this participation. The Gulf States Scholarship is forthcoming and should boom as well. The Product Display Show booth is under way. The theme has been determined and now we are in the design process. Recruitment is a number one factor this year and some ideas have been tossed around. That is a huge goal we must meet by increasing the number of students involved. Many things are in the works, so we hope they follow through as easily as they were thought of.

Thank you,

James Drake Young, CSI-s president

Drake Young, CSI-S

The One To Call Before You Dig

1-800-351-1111

MLGW is a member of the Tennessee One Call Systems, Inc., a computerized information center in Nashville linking those who dig underground (excavators) and those who operate underground facilities (operators) all across the state.

February Meeting

Dealing with Dual *MasterFormats*

In 2000-2001 CSI began an effort to bring long needed improvements to the 16 Division *MasterFormat*. This effort which began with a recommendation by the Technical Committee and the appointment of a special Task Team, culminated with the publication of the 50 Division *MasterFormat* 2004 Edition. This edition contained the most drastic changes in the documents 38 year history.

Although, the entire document has been completely restructured, best available estimates indicate that after its official release in 2004 it has yet to be completely or fully implemented by 80 percent of the design and construction industry. In other words only approximately 20 percent have adopted *MasterFormat* 04 exclusively. Conversely approximately the same percentage continue to use the 16 division format exclusively. This leaves a remainder of 60 percent using dual formats in varying degrees. Although it was the intent of CSI that *MasterFormat* 04 replace the 16 Division *MasterFormat*, after six years of promotion, transition to the 50 divisions *MasterFormat* has not yet occurred.

This lack of acceptance by the design and construction industry has for all practical purposes created two formats; one familiar and accepted and the other unfamiliar and not yet fully accepted. It was not until this past year (2009) that CSI even recognized that two formats existed and this was only done implicitly this past summer when formal support and recognition of the 16 Division *MasterFormat* was formally withdrawn by the CSI Board of Directors effective on December 31, 2009. This action has left a significant segment of the design and construction industry still being required to use the 16 Division format to fend for themselves with no use and update support available from the Institute and Regions. Unfortunately CSI has only provided one-way support from the 88 and 95 editions to *MasterFormat* 04. Backward compatibility has not been provided, making backward cross referencing between the two extremely difficult if not impossible. This strategy by CSI has resulted in the disenfranchisement of CSI members continuing to use the 16 division *MasterFormat*.

Many owners are now both unsure and unaware which format truly represents industry consensus and accepted professional practice. Designers are now faced with satisfying differing clients requirements, contractors and subcontractors are confronted with organizing projects differently depending upon which format was used by the designer for the organization of the project manual. Subscribers to commercial specification systems, (e.g.

Presented By:

Tommy Smith, CCS
Registered Architect

MasterSpec, SpecText, SpecLink) and information providers (Arcat, Sweets, 4Spec) are dictating that two systems be maintained and provided. Material suppliers must provide product data and information for guide specifications and BIM objects in both formats in order meet the demands of practitioners.

Forty-four years of inertia created by an extremely successful, member supported 16 division *MasterFormat* is not easily overcome by an organization with declining membership, especially when these changes were implemented without being based upon accepted practice, industry consensus, and without adequate support of the rank and file membership of CSI and other allied organizations

Cont'd

The 16 division *MasterFormat* may be analogous to the Peanuts charter Snoopy. Charles Schultz once remarked before his death that although Snoopy was his creation; he no longer had power over or could direct Snoopy. Snoopy had now assumed a life of his own. Although CSI created the 16 Divisions, CSI may no longer have any more control of the 16 Division Format than Charles Schultz had control over Snoopy. It seems that CSI is the only organization unwilling to consider the desires of its members and have refuse to support dual formats.

At this month's chapter meeting Thomas Smith, CCS, CSI, SCIP, an Architect with Architectural Consulting Services will present a summary of the differences and changes to the underlying principals of both *Master-Formats*. He will also discuss the dangers of dual formats and factors determining which format to be considered for a particular project. At the conclusion of the presentation there will be a moderated discussion to learn how different Memphis Chapter members are dealing with dual formats. Chapter member and non-members are encouraged to attend and learn from one another.

Due to the interest and importance of this program the February 4th SpecChat discussion will be on the above topic instead of the scheduled topic. The topic scheduled for this meeting (Products, BIM, and *MasterFormat*) will be deferred until Thursday March 4th.

Membership Report

By February, most of us have long forgotten our New Year's resolutions. With the Chinese New Year (2/14/10), we have another opportunity to renew our resolutions and refocus our efforts to make 2010 our best year ever!

I'm going to take full advantage of my CSI Memphis Chapter membership in 2010!

Here are a few more ideas for maximizing your Chapter membership in 2010:

- Take the CCS/CCCA exam.
- Sponsor a student chapter member for the Chapter Meeting.
- Contribute to the Scholarship Fund.
- Get 3 new business contacts at the Product Show in March.

Attend the Regional and/or National Convention in 2010

Welcome our New Member for January 2010 Marshall Burks, Acrylabs

The Membership Committee is still committed to our 50 new members for 50 years Goal. But we can't accomplish it without YOU! Please continue to invite people to our Chapter meetings and forward any potential new member contacts to the Membership Committee for follow up. Invite members of other organizations like AIA, IIDA, IFMA & USGBC to join our organization as well. Thank you for helping us grow!

PDS Committee Report

The PDS Committee met on Wednesday, January 20, 2010, at the Perkins Restaurant on Poplar at Highland. The meeting began at 11:30 AM, with the following in attendance:

Charles Cooper – Facilities
Dirk Veteto - Signage
Danny Clark – Marketing & Tickets
Dexter Varnell - Food & Beverage
Colby Mitchell – Student Booth Designer
Mark Thoss – Sales
Wally Bostelmann – Sales
Ron Roberts – Committee Chair & Sales
Gary Cofer – Awards and Kate Bidwell – Student Liaison were absent

All phases of the event were discussed. The student chapter will hold a meeting tomorrow, 1/21, to complete the final plans for the student booth. Booth sales are really picking up with over 60 booths reserved and several more in the wings. Wally, Mark, Gary and Ron will continue the sales effort trying to sell out the event. Dexter will be contacting the caterer and beverage supply vendors this month. Danny will be having the tickets printed before the end of January. It was explained to all as to how their expenses and the invoices from suppliers/caterers were to be paid. Ron will deliver the exterior entry sign to Hicks for revision from the 34th to the 35th annual PDS. Dirk will be installing the exterior and interior signage on the morning of March 16.

It was announced that Dan Brewer will be heading up the booth judging team with help from three or four other Chapter members. Ron will be meeting with Scott Guidry on Saturday, 1/23, to revise the Exhibitor Floor Plan so as to be ready for publication in the February, 2010 *Per-SPECTive*.

Hicks Convention Services will be setting up the Agricenter arena on Monday afternoon, 3/15. Exhibitors can begin installing their displays on Tuesday morning at 8:00 AM. Charles will be on hand to ensure the correct layout, including booth signage and electrical outlets. Plans were made to have Chapter members greeting the guests. Wally, Rachel and Nikole will tour the floor trying to enroll new members and pick up the advance 2011 PDS registration forms.

The next PDS Committee meeting will be on Wed., /17.

The meeting was adjourned at 1:00 PM.

*Respectfully Submitted by Ron Roberts
2010 PDS Committee Chair*

PDS Seminars

MEMPHIS CHAPTER CSI
PRODUCT SHOW SEMINARS
MARCH 16, 2010
AGRICENTER

SEMINAR 1

TITLE: BIM Seminar "Building Information Modeling and Beyond for the AEC Industry" presented by Applied Technology Group

TIME: 9:00a.m.-11:a.m. or
1:00pm - 3:00pm

SPEAKER: Ms. Collette Reid-Rice, Masters Degree in Architecture, LEED Certified, BIM expert and Jeff Jenkins of Applied Technology Group

TOPIC: This course will briefly review the history of BIM from its origins out of manufacturing, to the adoption into the AEC industry. We will also explore the advantages and benefits of using BIM vs traditional CAD design, and then look at ways to better leverage the information obtained from a digital model for LEED certification and Green Build design. In closing, industry experts will share their experiences with BIM and how they leverage the information obtained from digital models to improve design, communication, and performance. ***This class is worth 2 CEU credits.***

SEMINAR 2

TITLE:- Floor Slab Moisture Problem Resolutions Seminar presented by Barrier-Bac through Lance Escue

TIME: 3:00pm - 4:00pm

SPEAKER: Mr. Fowler Low with Barrier-Bac. Fowler Low is a graduate of Georgia Tech with a degree in Engineering. He has 25 years experience in the building materials industry with a focus on structural concrete, waterproofing, and moisture vapor barrier applications. His background covers all ranges of construction from the Engineering Design Stage to Product Manufacturing to Proper Installation of products to help control moisture in buildings.

TOPIC: This course will address moisture control methods in the building construction industry. ***This class is worth 1 CEU credit.***

January Meeting Report

Our Chapter Dinner Meeting on January 21st was well attended. The attendance was approximately 51 persons. Our attendance is up again well over the 40 attendee mark for the third or fourth time of our new fiscal year and this is exciting. Let's hope our new meeting location and new programs will continue to entice our members, guest, and visitors to attend our Chapter Dinner Meetings.

The program topic this month was 'Memphis Growth-A Revelation of Opportunity'. The program presenter was Jeb Fields, Vice President of Commercial Advisors, LLC. For more than 15 years, Commercial Advisors, LLC has been dedicated to providing strategic advisory services in office, industrial, land and retail development. Commercial Advisors, LLC does this by providing education about the economic engine for the growth of the Memphis region, the infrastructure to support that economic growth, and the challenges and opportunities in the community. Jeb illustrated for us how businesses make decisions to locate in certain geographic areas. Just a few important decision making facts include the tax structure, population, education, political and racial stability, shipping infrastructure, speed for just in time delivery and more.

We learned that Memphis is becoming know as an 'Aerotropolis'. We learned that believe it or not our political and racial makeup is at the top of the curve for acceptable corporate acceptance in their decision process. You would have to have been at the meeting to fully understand the implications of the two items just mentioned.

We thank Jeb for enlightening us on this subject matter and it was important to all in our CSI Chapter who does business in office, industrial or retail markets. And to those who were in attendance according to Jeb the next hot area for development is going to be the southeast quadrant or Shelby County.

We want to thank Tamko (represented by Cory Ewert) and Sealant & Waterproofing Supply Company (represented by Kay Young) for participating and having table top displays. They bought have new and established products. Remember them the next time you have questions concerning their products. Call on them with any help you may need for specifications or product samples.

We want to see you all at the next Chapter Dinner Meeting Feb, 25 at the Racquet Club. Remember that date because it is a slight change (the 4th Thursday in lieu of the 3rd Thursday).

Until then let us all remember the Products Display Show on March 16th at the Agricenter.

*Charles F. Cooper, CSI, CCCA
President Elect*

Thank you for your continued support and dedication to CSI and the Memphis Chapter. We look forward to seeing you for the meeting.

PS Remember to wear your pin!

Curmudgeon's Corner

A Dickens of a Tale

Scrooge was an old man, set in his ways. And why not? He had been doing things the same way for many years, and the resulting success was sufficient evidence of the wisdom of continuing in that path. Whenever it was suggested that change might be a good thing, "Bah, humbug!" was his response. "I like things the way they are! I started this business, I've been doing things the same way for fifty years, and I don't see any reason to change!"

One evening, a strange series of events befell our dear Mister Scrooge. Having had a particularly trying day, he tried to enjoy a rich repast and a few glasses of wine in an effort to forget his problems. As he fell asleep, he was thinking of how much fun he had in his youth.

The First Spirit

"Wake up, Scrooge!"

"Who is that?"

"It is I, the Spirit of the Past. Come, let us revisit those wonderful days!" As the words were spoken, they were transported to a city long ago. They stood in the midst of a group of young men busily engaged in excited discussion.

"Good Heaven!" cried Scrooge, looking about. "I know these people! They are specifiers, one and all! Oh, what a marvelous time that was, with the construction industry expanding, and so much work to do."

"Yes, it was. Do you recall why these people met, what they planned to do?"

"It comes back to me now! We were a group of specifiers

who were unhappy with the haphazard way specifications were done. Not surprising, considering we worked for the government! We met and decided specifications could be improved, and we formed an organization to work toward that end. We thought that, by working together, we could improve the practice of writing specifications, make them simpler and easier to understand, standardize government agencies' documents, standardize building codes, and bring greater efficiency to the industry as a whole. Ah, those were exciting days!"

"You certainly were enthusiastic, and set some lofty goals. And in the early days, you made significant progress."

Although it seemed to Scrooge that he and the Spirit remained stationary, the scene around them shifted and changed; different locations came into focus, and vivid images of people and documents materialized, then faded away.

"There is Carl Ebert!" Scrooge exclaimed. "He was there from the beginning - Institute President, first editor of *the Construction Specifier*, charter member of the DC Chapter. I see Ben John Small, a founder of the New York Metropolitan Chapter, and author of a column in *Pencil Points*. He was a great promoter of the value of good specification writing. And J. Norman Hunter! When he was president, we added twenty-two new chapters!"

"Once you started growing, what did you do to address the issues that brought you together?" asked the Spirit.

"Why, isn't it obvious? Look there - it's the *CSI Format for Construction Specifications*. The industry needed organization, and building designers quickly began using it to bring order

(Continued on 23)

Congratulations CSI Knoxville 50th!!

Saturday, Feb 6th at the Holiday Inn at Papermill 1315 Kirby Road - Knoxville, TN 37909 6-9PM

Maximizing Memberships

Lisa Namie has been practicing as a licensed Architect since October 28, 1986 when she obtained her first license in the State of Tennessee. She has been a partner with Fleming/Associates/Architects PC since 2000. Since graduating from the University of Virginia at Charlottesville with a Bachelor of Science in Architecture, she has been able to explore a variety of projects with various ranges of cost, complexity and design. Project types she prefers to concentrate in include higher-education/university/college, adaptive reuse and renovation of existing buildings, interior architecture, sports facilities, parking facilities, commercial/office, and government facilities. Although she has experience in all facets of the architectural profession, her concentration is primarily focused on architectural project management production of construction documents and construction administration. She is a Certified Construction Specialist and has been the architect of record for hundreds of projects, some of her clients includes Federal Express, Perkins Restaurants, National Bank of Commerce, SunTrust, Healthnet, St Agnes Academy, St. Mary's School and Southwest Tennessee Community College to name just a few. Her most recent project, however, might be the one for which she will be best known: Lisa was the Principal-In-Charge for Fleming Associates Architects of the production of construction documents and for ran the construction administration phase for the University of Memphis' new Law School renovation project at the former US Post Office on Front Street in Memphis. This \$32 million project's success simply would not have been accomplished without Lisa's dogged attention to details and her non-stop coordination of solutions for problems that arose almost daily from unseen conditions discovered in this Historic circa 1885, 1903 and 1930 buildings.

As a full spectrum architect with the experience of over 25 years, Lisa understands the importance and necessity of listening to what her clients need for their project to become a success. It is imperative for us, as Architects, to expend the time to understand what the project means to our clients. Listening to their needs and desires is paramount to developing a program with the client that will "meet and exceed their definition of success."

Lisa has lived in Memphis since 1963, a graduate of Bartlett High School with her Navy active-duty husband and CBHS son. Additionally she is continually looking for ways to improve herself, both professionally and personally.

Service to Our Country, CSI Members and Family

Retirement of Senior Master Sergeant Walter L. Raines

On June 9, 1969, just after graduating high school Walter L. Raines joined the Tennessee Air National Guard. Thus, he began a career that has spanned over 4 decades, entirely as a member of the 164th Airlift Wing. Walter retired December 31, 2009 with 40 years of service. Walter Raines is the brother of Pam Davidson.

(Cont'd from 21)

to their specifications. It was so useful, it was also used for filing information about products, and it became the industry standard *MasterFormat*. And see there? It's *SectionFormat*. We didn't stop with an overall grouping of information, we also established an order for the information for a specific product! Or "work result" as today's young whippersnappers say! There again, we saw the need for better communication through standardization, and we responded. And what about *PageFormat*? Once more, we created a standard for the industry!"

"Yes, you did all of that - and you created a forum where design professionals, product manufacturers and installers, and contractors could meet and discuss problems and solutions. CSI grew from a handful of people to a nationwide organization of nearly twenty thousand. Indeed, those were the good old days!" Suddenly, the Spirit disappeared, and Scrooge found himself wondering if he had seen the Spirit, or if it was just something he ate for dinner. He took a couple of antacid pills and went back to sleep, remembering the way things were, so many years ago.

The Second Spirit

"Wake up, Scrooge!"

"What is it this time? Are you real, or am I having indigestion?"

"I am the Spirit of the Present. It isn't your dinner, though you really should watch what you eat. You seemed to enjoy your visit with the first Spirit, so let's take another journey."

"If it's like the last one, it will be fun. Let's go!"

CSI Memphis CDT Study Course

The Memphis Chapter of the Construction Specifications Institute will sponsor an eight-week study course for the CSI Construction Document Technologist certification exam. This course qualifies for 2.4 CEUs from the Construction Specification Institute (CSI) or 24 AIA Learning Units (LUs), including 24 contact hours for Health, Safety, and Welfare. Included are topics on how to use and prepare written construction documents. Anyone preparing for the Construction Document Technologist (CDT), Certified Construction Specifier (CCS), Certified Construction Product Representative (CCPR), or Certified Construction Contract Administrator (CCCA) examinations will benefit greatly by attending. The Course will be based up on the *CSI Project Resource Manual*, *MasterFormat 2004™*, and *UniFormat™*.

CSI Memphis members who sign-up for the class and passes the 2010 CDT exam will receive a \$50 refund on their CDT Study Course fee¹. CSI Certification is industry recognized and a great professional development opportunity. A CDT after your name gives you an instant level of credibility, and we encourage you to take the challenge and test what you will learn in the class. Lastly, any student member of CSI enrolled full time in a university, college, or vocational studies who is registered to take the 2010 CDT exam may attend the class for FREE!

Sessions: 7 consecutive Thursday evenings, 1 Tuesday Plus! Review Session (optional for CDT examinees)

Date: January 28 – March 25

Time: 6:00 to 8:00 PM

Location: Pickering Inc.
Suite 300
6775 Lenox Center Court
Memphis, TN 38115

Exam Periods: Spring March 29-April 3, 2010
Summer June at the CSI Convention
Fall September 20-25, 2010

For more information on registering for the CDT exam, please contact the Harvey Wilmoth at hwilmoth@pickeringinc.com or 901-726-0810. Information and a registration form for the exam may also be found at www.csinet.org.

¹\$50 Refund applies only to CSI Memphis Members who paid the class fee. Membership must be active and dues paid between April 2009 and the time at which the results of the exam are announced. Applies to 2010 CDT examiners only. Students are not eligible for the \$50 refund.

CDT exam registration must be done through the CSI Institute. You may register online at www.csinet.org/certification or contact Harvey Wilmoth for a registration form to register by mail or fax.

Schedule

Session 1—January 28

Introduction—The Project; The Project Team; Project Participants; Project Team Participation; Facility Life Cycle

Project Conception—Defining the Project; Preliminary Studies and Due Diligence; Site Selection; Budget; Project Scheduling;

Session 2—February 4

Project Delivery—Services; Factors Affecting Project Delivery; Project Delivery Methods and Services; The Project Team

Design—Design Processes and Phases; Project Evaluation and Selection; Quality; Controlling the Variables; Cost Estimating and Value Analysis; Schematic Design Documentation; Design Development Documentation

Session 3—February 11

Division 00 - Procurement Requirements; Construction Agreements; Conditions of the Contract; AIA A-201

Session 4—February 18 Thursday, 7:00 PM - 9:00 PM

Division 01 - General Requirements; Specifications Practice; Project Manual and Specification Practices

Session 5—February 23 Tuesday night

Specifications Methods and Language - Methods of Specifying; Specifications Language Document Coordination - Drawings; Coordinating Drawing and Specifications

Session 6—March 4

Modifications and Warranties - Procurement and Contract Documents; Warranties

Session 7 - March 11

Procurement and Construction—Project Information; Agreements; Roles and Responsibilities; Submittals

Session 8—March 18

Facility Management—Facility Manager's Role In Project Closeout; Operations and Maintenance; Resources Materials; Facility Evaluation; Life Cycle

Session 9 - March 25

CDT Practice Exam and Review Session

Certification

CONSTRUCTION DOCUMENT TECHNOLOGIST

The CDT program - a rigorous and comprehensive course of study leading to a Construction Documents Technologist certificate - is the Path to the other 3 Certification exams, and the key to expanding your knowledge of Contractual Relationships, Use of Construction Documents, and the Construction Process. Using CSI's Project Resource Manual and the AIA and EJCDC General Conditions and Contract Forms, you will learn the stages of Construction Project cycles, Documents produced in each phase, and Relationships and Responsibilities of Project Participants to become a more confident and effective member of your Project Team.

CONSTRUCTION SPECIFIER

The CCS program builds on your knowledge and experience in preparing construction documents by focusing on Construction Contract Types, Agreements, Conditions of the Contract, Changes in the Work, Division 1 General Requirements, Bidding Documents and Requirements, Document Organization, Production Techniques, and Specifying Techniques and Applications. Well-written documents are the best insurance for any project, making your role as a specifier ever more critical. As a Certified Construction Specifier, you will offer the assurance of excellence in preparation of Specifications and other Contract Documents.

CERTIFIED CONSTRUCTION CONTRACT ADMINISTRATOR

The CCCA program guides you through the complexities of modern construction projects, developing your skills and understanding of Project Delivery Systems, Roles and Relationships, Preconstruction Activities, Submittals, Meetings, Construction Observation, Document Interpretation, Schedules and Contract Time, Claims and Disputes, Modifications, Payments, QA/QC, and the Project Closeout process. As a Certified Construction Contract Administrator you will demonstrate to the industry that you understand the construction process, and are a skilled administrator in a time of complex projects, tight delivery schedules, and shrinking budgets.

CERTIFIED CONSTRUCTION PRODUCT REPRESENTATIVE

The CCPR program gives product representatives an in-depth understanding of the overall construction process, and the ability to communicate more effectively with other members of the Construction Team by studying Principles of Effective Product Representation, Marketing and Product Information, Preparation of Construction Documents, Specification Techniques, Division 1

Concepts, the Bidding and Substitution Processes, Warranties and Guarantees, and Construction Activities. As a Certified Construction Product Representative you will be sought out as an Industry Expert and be a vital source of technical information.

FIVE REASONS TO TAKE THE CDT

1. **Impress current and future employers.** Show your employer that you are willing to learn more about the industry and state-of-the-art construction documentation. Future employers will be more inclined to hire you, because they will recognize that CDT training applies across the industry. They will also know that you require less on-the-job training.
2. **Gain knowledge you can rely on.** You will learn the recommended and preferred practices for design and construction industry documentation. You will fully understand how various documents relate to each other and how they impact project administration and execution.
3. **Set yourself apart from the rest.** You will be able to use the industry-recognized professional credentials "CDT". Whether you are a constructor, designer, or material supplier, these credentials will add to your professional credibility.
4. **Invest in your future.** Successfully passing this exam will help solidify your foundation and enhance opportunities for future advancement.
5. **Join and Elite Group.** Your name will be listed in the annual CSI directory an important resource for people seeking qualified professionals. You will receive local, regional and national recognition.

50TH ANNIVERSARY

(Cont'd from 23)

Once again, Scrooge and the Spirit were surrounded by changing scenes of places and faces. But it wasn't quite the same.

The construction industry was even stronger than before. Despite a few economic setbacks along the way, there were many more design professionals, contractors, and building product manufacturers than ever before. The industry appeared to be moving ahead at a frantic pace, with plentiful new construction and renovation of existing buildings, seemingly without limits. Projections of future work indicated more work would be done in the next several years than ever before.

The results of Scrooge's earlier work were evident. That part of the construction industry involved with buildings was making good use of CSI's Formats: manufacturers included *MasterFormat* numbers on their literature; design professionals and contractors alike knew where to look for whatever information they needed; and, even though specifications often ignored the rules established in CSI's venerable *Manual of Practice*, communication was much improved over that which existed before CSI's standards existed.

And, where before specifiers were forced to create their own documents, there were now several commercial master guide specification systems, some of them automated to the point that the user no longer had to worry about section numbers or titles, cross references, or all of the other nagging minutiae that consumed so much of a specifier's time in the past.

Scrooge was delighted, thinking he would continue on and become even more successful. Still filled with such thoughts, he was taken aback when the Spirit showed him a smaller part of the industry - his own business. "Whatever is happening?" asked Scrooge. "The industry is growing by leaps and bounds, yet my own part of it is not keeping pace! There are so many fewer members, and the chapters that once were thriving and growing have lost their vigor! Is it possible I am mistaken? How could I have missed such ominous portents?"

Sadly shaking his head, the Spirit replied, "What you see *is* what now is. From the time of your visit with the first Spirit, your membership has decreased by a quarter. Many of your chapters seem to have trouble understanding what they are to do. And, in the comfort of your middle age - I'm trying to be kind - you lack the energy and purpose of your youth. You have become complacent, satisfied with your great accomplishments of days gone by."

"You have been, perhaps, too successful, and, pleased with that success, failed to see the opportunities to further improve communication in your industry. You have continued to concentrate on paper documents, even though the problems of the past have been solved, and little remains to be done with them. It is in electronic communication that today's challenges lie."

The Last Spirit

The second Spirit vanished, only to be replaced by yet a third Spirit.

"Judging by what has gone before, am I correct in assuming you are the Spirit of Yet to Come? If so, I fear what you may have to say. And yet, I sense that the visits by you and your kin are meant to help, and I am ready to listen."

Scrooge and the third Spirit were transported to an indefinite, yet not distant, future. Around them appeared a group of young people, engaged in serious conversation.

"I thought CSI was a TV show way back when!" exclaimed one. "Well, yeah, but there was this organization with the same name, that had a huge impact back in the latter part of the twentieth century. They did some really cool stuff, like organizing construction information - back when it was all on paper. You wouldn't believe how crazy construction documents were before they came along."

"So what happened to them? If they had so much going, how did they let it slip away?"

"I don't understand it. What they did for paper later needed to be done with electronic documents. Maybe it was just a case of turning into a bunch of old farts, who didn't understand computers and couldn't see the new problems."

"Didn't they do a lot with education and certification?"

"They did, but they were so busy telling each other how important they were that they forgot to tell anyone else. Here's a funny thing: After all the good things they did, and not telling others how important those things were, other groups came along, and in just a few years each convinced government agencies across the country that what they did was *the* most important thing. First it was energy-efficient buildings, then accessible design, commissioning, design-build, construction management, "sustainable design", and somewhere in there was "partnering". All of which should have been done by design professionals all along. In the end, the things CSI did were absorbed by other organizations, and they didn't have anything to do anymore."

"I bet it was pretty sad in the end, when it was just a bunch of the same old people getting together, reliving the good old days, waiting for each other to die."

Scrooge cried out in agony, "Spirit, please tell me that what you have revealed is only what might be, rather than what is destined!"

After a pause, the Spirit replied. "It's not that you no longer do useful things. Your work with interoperability and global standardization are truly worthy efforts, and will one day make the industry better - but those things are of no immediate concern to your existing members, and they won't bring in new members. You have not accepted the possibilities of the near future, when the value of information itself will far outweigh the value of explaining it in words - a process that continues to demand less and less expertise."

"Some have said that all professional organizations have suffered loss of members and inability to connect with younger people. That may be true in most cases, but it is not an excuse to relax. Those organizations that survive will have found something of value that will attract new members. You claim to represent all those involved in construction, yet you have done little to attract most of them. They represent an untapped resource of knowledge and challenges that can carry you into the future."

"You do have much to fear, and much to do if you are to avoid the future we have seen this evening. That is but one possible path, though it is one that becomes more likely with each day you do nothing to avoid it. It is possible to regain your former stature, but only if you look to the future. What was it that made you great? It was your ability to see the needs of communication in the construction industry and to provide solutions for those problems. Yes, certification has become more important in the construction industry, but if that certification is not required, it has minimal value. And yes, education is important, but there are many well-established sources of education, and you have little chance of displacing them."

The End?

We leave Scrooge on the verge of waking. What will he do when he wakes? Will he regain the intensity of his youth, or will he be content to rest on his laurels, meeting old friends until they are no more?

Sheldon Wolfe, RA, FCSI, CCS, CCCA
